

50 MM

Dining table

A family of tables and console tables with essential lines, the archetype of table. Made by a single cast of fibre-reinforced concrete that envelops both table top and legs over a 50mm metal structure.

Each piece is then left to mature with controlled temperature and humidity for at least four weeks before applying the protective finishing.

Available in three sizes to be used as dining table, coffee table or side table, the metal structure gives it a constant 50mm thickness throughout.

Use: indoor / outdoor

Designer: Giorgio La Corte

Make and materials: concrete, steel.

Colours: ardesia, perla, ombra, custom.

Dimensions: L160, 200 - D70, 100 - H75.

SKU: N/A | **Categories:** [Indoor Tables](#), [Furniture Brands](#), [Forma & Cemento](#), [Tables](#) |

BRAND

Forma & Cemento

Forma&Cemento is an Italian excellence in the art of crafting concrete. Founded in 2014 by individuals with backgrounds in architecture, engineering, yacht construction, and concrete production, our mission is to transform this traditionally humble material into a prized element akin to the finest marbles and sought-after woods, through skilled craftsmanship and careful structural study.
