

DITTO MODULAR GROUP

Ditto Modular Group is the core configuration within the Ditto modular seating system, designed for flexible hospitality and commercial interiors.

Constructed from a defined series of modular units, the system allows designers and operators to build seating clusters, curved layouts or extended lounge arrangements that suit a wide range of floorplans.

Each module integrates seamlessly, enabling continuous runs or sculptural groupings that support circulation, zoning and spatial flow within restaurants, cafés, hotel lobbies and commercial breakout areas.

Built using FSC-certified plywood and high-density moulded foam, Ditto is engineered for commercial performance and long-term durability in high-use environments.

HOW DITTO MODULAR GROUP WORKS

The system is based on repeatable unit dimensions that can be combined, mirrored or extended. This allows seating to scale from compact arrangements to large hospitality installations while maintaining design consistency.

Upholstery and base finishes can be customised to suit interior palettes and branding requirements.

To begin planning your configuration, we will require:

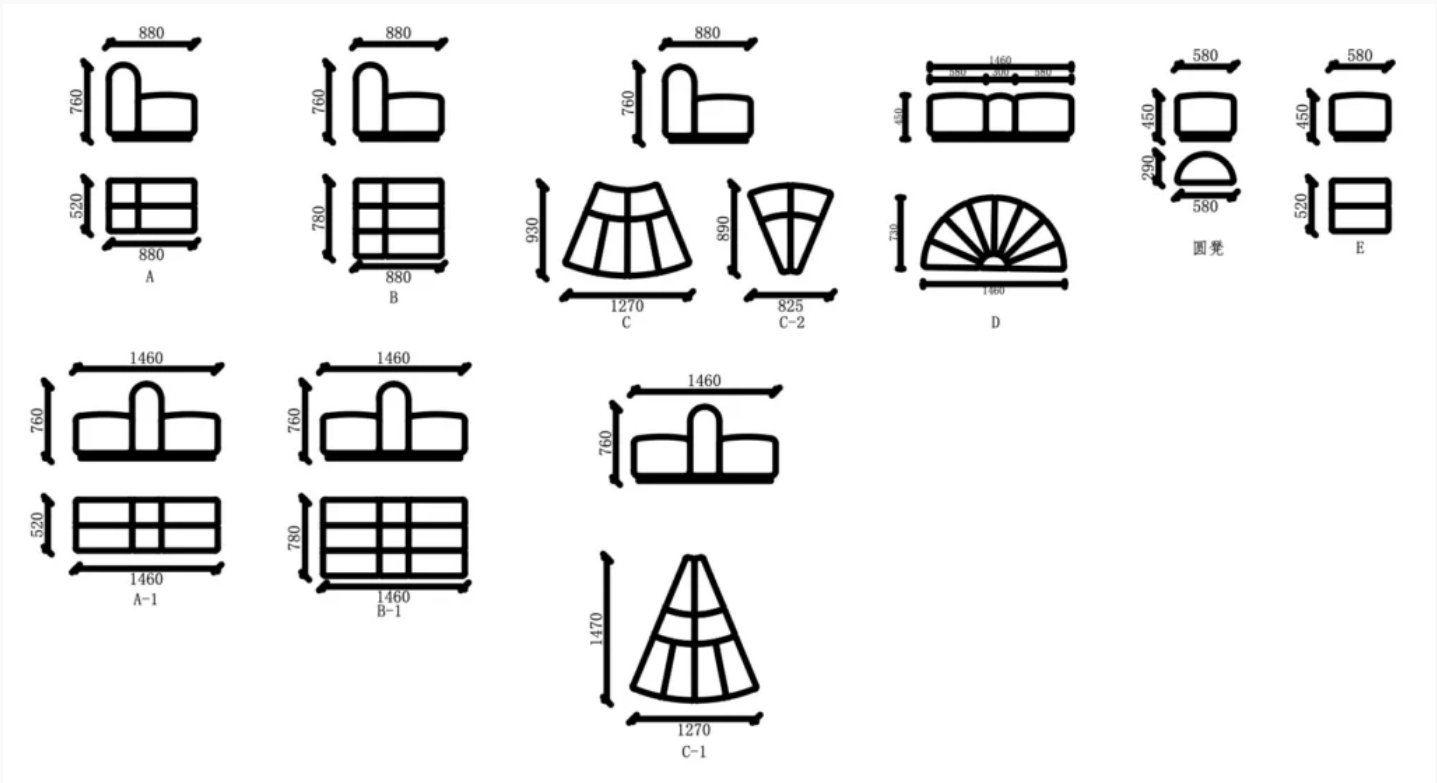

- Your intended layout or floorplan
- Target seating capacity
- Selected upholstery and framing finishes
