

RADIUS

Radius is a modular series of commercial recycling bins designed for public environments where durability, stability and ease of servicing matter.

Each bin is engineered to stay securely in place while remaining simple to empty and maintain. Units connect together to create flexible recycling stations, allowing airports, transport hubs, education campuses and public buildings to configure waste streams as required.

Manufactured in solid metal, the Radius Series is designed to integrate seamlessly with **Green Furniture Concept** modular seating systems. The collection also performs as a standalone recycling solution in high-traffic commercial interiors.

Key features:

- Modular bins that connect for multi-stream recycling
- Stable base designed to remain fixed in position
- Easy-access internal liners for efficient servicing
- Solid metal construction suited to public spaces
- Compatible with Green Furniture Concept seating systems

PRODUCT DESCRIPTION

Frequently Asked Questions

Are Radius recycling bins suitable for airport terminals?

Yes. Radius bins are designed for high-traffic public interiors including airports, transport hubs and large atriums.

Can multiple waste streams be combined?

Yes. Units connect together to form multi-stream recycling stations suited to different sustainability requirements.

Are the bins compatible with Green Furniture Concept seating?

Yes. Radius is designed to complement Green Furniture Concept modular bench systems but also works as a standalone solution.

BRAND

Green Furniture Concept

Green Furniture Concept creates sustainable furniture and lighting for public interiors. Their work focuses on transforming high-traffic environments into welcoming, people-centred places. Each collection is carefully designed to enhance comfort, movement, and connection within airports, retail hubs, and civic spaces.

Manufactured in Europe, their products can be found in global landmarks such as Dublin Airport, Topanga Mall in Los Angeles, and Stockholm Central Station. Every piece combines timeless design with long-lasting materials and circular production methods — proving that sustainability and design excellence can coexist seamlessly.

Green Furniture Concept's approach goes beyond individual products. It's about creating places where people want to linger — spaces that are both profitable and restorative. In fact, Edinburgh Airport recorded a 14% increase in retail and F&B sales in areas furnished with Green Furniture products.

Harrows are the exclusive partners for Green Furniture Concept in New Zealand, while Hospitality Furniture Concepts proudly represents the brand in Australia.
