

S-TORRE CHAIR

TORRE seating comprises two parts, both made from glass-fibre-reinforced polypropylene: a four-legged base and a backrest. The two parts, once joined together, look like a single item.

The strength of the material and structure of this chair make it an ideal product for outdoor projects, too, such as terraces, al fresco areas and gardens.

The retro design, inspired by traditional bistro chairs, makes the product ideally suited to use as restaurant and bar seating while, at the same time, it is also a popular choice for residential settings, such as dining rooms, bedrooms and corridors.

The chair's structure has been designed for stacking: this means it can be neatly and compactly stacked away when not in use. An excellent solution for premises that require flexibility, adding and removing seating to meet changing needs.

Available in seven colours, Torre can also be fitted with a little panel upholstered in fabric or imitation leather, which allows you to mix and match colours and provides a comfortable seat.

BRAND

Colos

All projects by Colos emerge from the opportunity given to young designers from various nations to encounter the world of Italian industry. This encounter between the designers' esthetic and functional research and the company's great industrial experience leads to solid and elegant products which are developed within an optimized production process.

COLOS

The manufacturing is exclusively carried out in the company factories in Loria, Italy. In doing so, Colos can ensure the quality of its products and of the working conditions of its personnel. Ethical, durable and affordable: this is what a Colos product is to us.
