

SEINA

The **Seina Chair with aluminium frame and teak wood** is designed for commercial outdoor settings where durability and clean design matter. The powder-coated aluminium frame provides a lightweight, corrosion-resistant structure suited to high-use environments such as cafés, restaurants, and hotel terraces. Teak wood detailing introduces a natural contrast, offering both visual warmth and long-term performance in outdoor conditions.

Built for **indoor and outdoor use**, the Seina Chair performs well across alfresco dining areas, rooftops, and hospitality venues exposed to the elements. The teak components are naturally weather-resistant and will age to a soft silver patina over time, while the aluminium frame maintains its strength and finish with minimal upkeep. This makes it a practical choice for operators seeking low-maintenance outdoor furniture.

With a balanced mix of metal and timber, the Seina Chair fits easily into both modern and relaxed environments. Its simple form allows it to work across a wide range of commercial applications, from casual dining to more refined outdoor settings, while maintaining a consistent and durable seating solution.
