

SKYLINE

The Skyline series of waste containers and recycle bins are manufactured in Germany by Auweko and exclusively distributed throughout the Americas by Arconas. These recycle bins offer an elegant, functional stainless steel solution with clean lines and a minimalistic design. Skyline is available with 1- 4 openings in a funnel shaped configuration with graphics on the sloped surfaces to assist users in separating waste correctly.

Front Opening Door

The skyline series feature front opening doors. This more ergonomic feature makes servicing these waste bins quick and easy for maintenance staff.

Optional Hood

The Skyline series can be configured with an optional hood to shield contents from rain and snow in outdoor environments.

Standard or Custom Graphics

We work with you to choose graphics that support your waste and recycling program. Choosing the right graphics can help improve program participation and ensure waste gets put in its place.

Notable Features

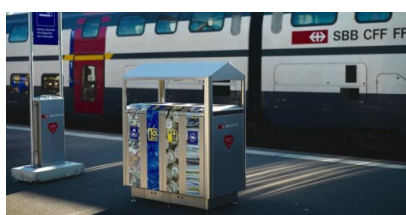

- Stainless steel body
- Galvanized steel inner containers
 - Safety lock
- Front opening doors
- Easy maintenance

Construction

- Body: 1.5 mm stainless steel material 1.4301 / AISI 304

About Auweko

Since 1993, Auweko has developed and produced waste and reusable materials systems that unite form and function.

Auweko bins are made from high-quality stainless steel, designed to be weather resistant, vandal resistant and easy to maintain in demanding public environments.

[Auweko Bins FAQ \(Public Space Use\)](#)

Where are Auweko bins commonly used?

Auweko bins are used across public space environments such as airports, transport hubs, streetscapes, universities, shopping precincts and government facilities.

Are Auweko bins suitable for recycling and waste separation?

Yes. Auweko offers modular waste and recycling stations that support clear separation and efficient servicing.

What are Auweko bins made from?

Many Auweko systems use durable stainless steel designed for outdoor exposure, high traffic and easy cleaning.
