

TRAIL T-BASE TABLE

The TRAIL twin base offers the NOROCK patented self-stabilising function for your larger, rectangular tabletops. Perfectly matches with all TRAIL bases and complementing other NOROCK designs.

The NOROCK TRAIL self-stabilising table base exemplifies modern simplicity. The linear, clean design and concealed componentry complements a robust construction for use in any setting.

With a special zinc coating, TRAIL T-BASE is suitable for both indoor and outdoor applications.

Self-stabilising table base – NOROCK's award-winning bases use a simple mechanical system with four pivoting legs that are interconnected in such a way that they must reach an average weight loading on all four feet. When a table is placed on an uneven surface the feet will move until all four feet reach a state of equilibrium or more simply, a state of stability.

Material : Powder-coated steel with a zinc phosphate layer for added corrosion resistance

Powdercoat Base Finishes : Metallic Silver, Sandstone Black, Rust, Antique Bronze, White

*Maximum table top size – 1550mmL x 800mD
